# GainSeeker<sup>®</sup> eLearning

## **Course details for the GainSeeker eLearning courses**

### ***Fundamentals of Understanding GainSeeker***

Creating a data-driven culture in your organization is easy when everyone understands and speaks a common language about process variation and process improvement. The *Fundamentals for Understanding GainSeeker* video course is an invaluable tool for teaching the underlying principles of process variation to persons at any organizational level. By training more of your staff in these foundational concepts, you'll expand the number of "data heads" in your organization—people who can help make decisions based on data.

The course uses engaging videos, instructional text, supporting materials, and assessments that help course trainees retain and apply the learned knowledge when they use the GainSeeker software.

### ***Introduction to GainSeeker***

The *Introduction to GainSeeker* eLearning classes offer participants the foundational skills and knowledge they will need to use the GainSeeker software. This self-paced training will allow those who are unfamiliar with the GainSeeker system to become quickly acclimated with the software and ready to apply the information they have gained. Afterwards, employees will be better equipped to use GainSeeker, its data entry and analysis tools to improve processes throughout your company.

### **Course Content**

Fundamentals for Understanding GainSeeker addresses the following topics:

- What is the ideal process
- Difference between quality from a product perspective and quality from a process perspective
- Examples of primary reliance on product and process controls
- Determining if your organization is getting the best value from your purchase

#### Introduction to GainSeeker SPC

- Creating new standards
- Entering data using GainSeeker Inspections and Templates
- Creating charts and tables using default and custom settings
- Using tools such as Filters and Grouping Data to aid in analysis
