

Job Description

Job Title	Software Developer/Cloud DevOps
FLSA category	Salary, Exempt
Department	Development
Reports to	Cloud Product Manager
Date of last edit	September 2020

Overview

Hertzler Systems is seeking a front-end web developer and Azure systems administrator to help develop the GainSeeker Suite cloud application in Azure. This job will appeal to someone who enjoys solving real-world problems through architecting and implementing full-stack software solutions. While this developer will have the primary responsibility of leading Azure system administration, writing code will be 80% of the job initially. This developer will need to become proficient in writing code for the full stack of the GainSeeker Suite, which includes backend C# .NET Core, desktop .NET, web app front ends, as well as maintaining the existing GainSeeker desktop applications (also in C# .NET).

This is a full-time, salaried position that reports to the Cloud Product Manager and is responsible for designing, creating, coding, testing, and administrating new software features and products for the cloud. This position requires minimal travel (less than 10%).

Hertzler Systems Inc. is a leading provider and integrator of Statistical Process Control and analytic software systems to manufacturers. We offer a Dynamic Work Environment, empowering employees to do great work from distributed workplaces. Team members enjoy flexible work hours and a competitive compensation and benefits package.

Skills Needed

- Developing or maintaining web applications in a cloud computing environment: Azure, AWS, Google Cloud, Digital Ocean, etc.
- 3+ years of professional software development or system administration
- Front-end web development: JavaScript, CSS, HTML
- SQL and Database management or design
- Programming in a strongly, statically typed language: C#, Java, C++, TypeScript
- Openness and aptitude to learn and try new technologies
- Strong attention to detail, thorough, organized, and systematic
- Ability to meet deadlines and multi-task
- Enjoys solving problems with an analytical approach
- Self-motivated

Nice to have experience with:

- .NET or .NET Core; ASP.NET or ASP.NET Core

- Bash or PowerShell scripting
- API management and design
- A JavaScript front-end framework, such as Vue, Angular, React, Knockout, or Ember.
- SQL Server, PostgreSQL, or MySQL
- CDN configuration and management
- Responsive web design
- Container technology for web applications; Microservices/Miniservices architecture
- Best practices for security, site reliability, and DevOps in a cloud computing environment
- Git or equivalent SCM
- IoT platforms

Job Duties

- Architect and lead management of Azure resources for a multitenant SaaS application.
- Develop concept and then design, program, and test new software products and features across the GainSeeker tech stack.
- Assist customer service personnel when support tickets are raised to the development team.
- Help write, maintain, and implement test procedures and data sets for software products.
- Assist in documenting and training on new software features.
- Work on special projects and perform other duties as required.

Company Culture & Management Style

Our Values

- Make customers wildly successful
- Embrace and lead change
- Build strength on strength
- Work hard, have fun
- Be direct, honest, & consistent
- Be humble

Hertzler Systems culture and management approach is influenced by Dynamic Governance (Sociocracy), which operates using three basic tenets: equivalence, transparency, and effectiveness. All employees are involved in teams where the work of Dynamic Governance happens. Hertzler team members actively participate in collaborative decision-making on matters they have a stake in.

Salary & Benefits

Hertzler Systems Inc. offers a competitive compensation and benefits package.

How to Apply
